RESPONSE TO RESTRICTION REQUIREMENT

United States Patent and Trademark Office
Customer Service Window
Randolph Building
401 Dulany Street
Alexandria, VA 22314

Sir:

In response to the Restriction Requirements mailed **May 5, 2005** and **March 9, 2006**, Applicants respectfully **traverse** the Restriction Requirements, as set forth herein.

With respect to the Restriction Requirement of **May 5, 2005**, the Restriction Requirement asserts that the “new claims are no longer directed to cryptography of the content of a wireless communication such as the original set of claims” (Restriction Requirement **May 5, 2005**. Page 2). This assertion, however, is respectfully traversed, because the original dependent claims, still pending, and the added claims include cryptography (see, e.g., independent claim 1 and dependent claims 9, 27 and 28, and new independent claim 29 and dependent claims 37, 43 and 44). In this respect, the previous independent claim 1, before being amended, did not explicitly recite “cryptography of the content of a wireless communication.”

With respect to the Restriction Requirements of **March 9, 2006**, the previous claims were merely amended to more clearly recite that that the “mobile unit identifier” is static an

that there are a plurality of the “updateable identifiers” used for communications and to recite further features of the invention, wherein the updateable identifiers are updated with each call based on the static mobile unit identifier, at a periodic time interval, and/or upon an occurrence of a triggering event, in order to prevent unauthorized communications with the communications device. Applicants submit that the newly added limitations were in the originally submitted invention and the noted amendments are consistent with the invention recited in the original claims and do not warrant the present Restriction Requirement, which is respectfully traversed.

Moreover, Applicants submit that examination of the present claims would not pose a serious burden to the examiner, as noted in MPEP § 803, as the Examiner had previously searched and issued an office action relating to the features recited in the present claims and which still include “cryptography of the content of a wireless communication,” as evidenced by independent claim 1 and dependent claims 9, 27 and 28, and new independent claim 29 and dependent claims 37, 43 and 44. Accordingly, Applicants submit that the search and examination of all the pending claims in the present application can be made without a serious burden on the Examiner.

In view of the foregoing, it is submitted that the present Restriction Requirement is traversed and examination of the pending claims is respectfully requested. If, however, the Examiner deems that any issues remain after considering this response, the Examiner is invited to contact the undersigned attorney to expedite the prosecution and engage in a joint effort to work out a mutually satisfactory solution.

Respectfully submitted,

NIXON PEABODY, LLP
